-----

Two-tank direct storage was used in early parabolic trough power plants (such as Solar Electric Generating Station I) and at the Solar Two power tower in California. The trough plants used mineral ...

Solar EOR is proving to be a viable alternative to gas-fired steam production for the oil industry. Solar EOR can generate the same quality steam as natural gas, reaching temperatures up ...

The present study investigates the feasibility of solar hybrid system to generate steam in the oil refinery to maintain the temperature of heavy crude oil products before despatching from ...

This paper proposes a solar-assisted method for a petrochemical refinery, considering hydrogen production deployed in Yanbu, Saudi Arabia, as a case study to greenize oil refineries.

A novel approach, the Sand Thermal Battery Hybrid, offers a sustainable and multi-functional solution by combining solar photovoltaics (PV), concentrated solar energy, thermal oil circulation, and ...

Integrating offshore solar and hybrid power systems into oil and gas operations allows companies to diversify their energy portfolio. This transition helps lower the carbon footprint and greenhouse gas ...

Solar-enhanced oil recovery (SEOR) represents a significant advancement in extraction technology. This innovative approach uses concentrated solar power to generate high-pressure ...

This article delves into the mechanics, benefits, challenges, and real-world applications of Siemens Solar's solar solutions in oil and gas, offering a detailed perspective on how renewable ...

The solar heating system for crude oil utilizes traditional oil heaters for preheating, coupled with renewable solar energy, to implement a low-carbon heating method.
