Togo, a small West African nation, is poised for a significant boost in its renewable energy capacity. In May 2025, the African Development Bank (AfDB) approved a financing package ...

Since 2020, Togo has increased its electrification rate from 52% to 69%, providing thousands of rural households electricity through solar kits and the Blitta solar power plant.

Find out how Togo is accelerating its energy transition with a 62 MWp solar power plant in Sokodé, supported by the African Development Bank and its partners.

With this 400 MW solar project, Togo positions itself as a regional leader in the energy transition. The country demonstrates that strategic vision, technological advancement, and social ...

The 42MW solar PV plant in Sokodé represents a significant milestone in Togo's renewable energy journey. With the continued support of international partners and the firm ...

Togo's solar capacity reached 100 MW by 2024, boosted by the 50 MW Blitta Solar Plant, West Africa's largest when launched in 2021. Aiming for 50% renewable energy by 2025 and universal access by ...

LOME, Nov. 7 (Xinhua) -- Togo on Thursday received 3,900 sets of photovoltaic power generation systems provided by China under the "Africa Solar Belt" project.

Togo is leading the energy transition in Africa thanks to an ambitious strategy focused on solar energy. The country aims for universal access to electricity by 2030 and aims to increase the ...
