-----  
Are Sunbolt solar workstations NEC compliant?

With multiple charging outlets, customizable branding options and outstanding durability, Sunbolt Solar Workstations deliver reliable power that will enhance any outdoor space. These off-grid, NEC-compliant workstations are ideal for charging smartphones, tablets, laptops, and other mobile electronics that utilize a battery.

Can a portable power station be recharged using solar panels?

Portable power stations come in a broad range of sizes, from smaller models capable of charging a few devices to high-capacity backup units to keep your lighting and critical appliances on during a days-long blackout. And, many can be recharged using solar panels.

Are Sunbolt solar workstations eco-friendly?

Designed and built with a quality and sustainability-first attitude, each product is made from architectural-grade, eco-friendly materials. With multiple charging outlets, customizable branding options and outstanding durability, Sunbolt Solar Workstations deliver reliable power that will enhance any outdoor space.

How long does it take to charge a solar power station?

Recharging the power station from empty using a standard 120-volt home outlet, it recharged to full capacity in 2 hours and 36 minutes. You can also charge the system, with the included adapter, at EV charging stations, with solar panels (sold separately), a car charger, or combinations of these to speed things up.

Our 50KW/100KWH outdoor cabinet energy storage system, with its excellent performance and thoughtful design, is the ideal choice for outdoor energy storage applications.
