The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the coming years.

Energy storage is in its infancy in Thailand, and new business models are already emerging. As the regulatory framework adapts to accommodate new players in the market, we ...

Reaching carbon neutrality requires deploying new technologies in the energy sector (e.g., advanced energy storage and electric vehicles) and increasing the penetration of existing low-carbon ...

"Our report shows Thailand can prioritize deployment of renewables and energy storage to meet growing electricity demand," said Ponglert Chanthorn, BNEF's Thailand and Singapore lead ...

Thailand's Energy Regulatory Commission has approved a Feed-in-tariff (FIT) scheme for renewable energy, which carries the inclusion of utility-scale solar, battery energy storage, wind, and biogas.

To address this, the Electricity Generating Authority of Thailand (EGAT) has developed Energy Storage System (ESS) to provide backup when the sun is not shining or the wind is not blowing. This article ...

Although Thailand is a regional leader in renewable energy, its use of energy storage is nascent. EGAT undertook some studies on the potential for energy storage and is piloting three battery energy ...

The Ministry of Energy, through the Energy Policy and Planning Office (EPPO), together with all relevant agencies, has prepared an action plan to promote Thailand's battery energy storage ...

In 2023, the Energy Policy and Planning Office (EPPO) partnered with relevant agencies to create an action plan promoting Thailand's battery energy storage industry. Four key areas were ...

Thailand's 2024 plan increases renewable energy, highlighting crucial battery storage systems for buildings
