Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of attention; it has been subscribed to projects that are about twice the desired capacity.

The awarded projects are part of the Alma-GBA tender, which targets critical nodes in the Buenos Aires Metropolitan Area (AMBA) to enhance grid reliability and efficiency.

As Buenos Aires accelerates its transition to clean energy, advanced energy storage systems are becoming the backbone of reliable power distribution. This article explores how lithium-ion batteries, ...

In a global context where energy storage is becoming critical for grid reliability and decarbonization, Argentina's over-subscribed tender illustrates the appetite for scalable, bankable ...

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid. In a strong ...

The \$540 million investment in energy storage isn't just about keeping the lights on in Buenos Aires. It's a strategic bet on a more flexible, reliable, and sustainable energy future for ...

This week, the Argentinian government opened bids for the AlmaGBA tender, initiated in February 2025 to procure 500 MW of battery energy storage system (BESS) capacity for critical ...

The implementation of storage solutions aims to prevent power outages, improve system efficiency, and ensure a stable electricity supply during high-demand periods.

A georeferenced analysis of project locations, presented in the official tender document, indicates a strong concentration of bids in zones with high nodal impact--suggesting strategic ...

Three grid-side energy storage projects in Buenos Aires

Summary: Buenos Aires has launched an ambitious energy storage policy to modernize its grid and integrate renewable energy. This article explores the policy's framework, its impact on industries like ...
