New international certification for Vienna Airport: For safety reasons, the handling of air cargo shipments with lithium batteries is subject to particularly high requirements.

The CEIV Li-batt certification confirms our compliance with safe packing, handling, and shipment of lithium batteries by air while complementing our earlier qualifications for the shipment of dangerous ...

Here's what to know in regard to lithium battery shipping by air for all shippers, freight forwarders and ground operation personnel.

This article explores modular solar container technology, cost-saving strategies, and implementation case studies tailored for Central European markets.

Due to their chemical properties, lithium batteries can catch fire or explode if handled improperly, making the transportation of these products particularly challenging. Vienna Airport has ...

Vienna International Airport has received CEIV Lithium Batteries certification from the International Air Transport Association (IATA).

Vienna International Airport has achieved a major milestone by ...

Vienna International Airport has achieved a major milestone by receiving the IATA CEIV certification for lithium battery handling, enhancing its safety protocols for air cargo.

As with all air cargo players, the airport is faced with growing numbers of Lithium Battery shipments, which - given their volatility if damaged - require the strictest safety and handling standards.

When it comes to the transportation of delicate and valuable equipment like solar inverters, proper packaging
