-----  
How many solar panels are in a roof top PV plant?

Since February 5, 2017, the roof top PV plant consists of 7,694 high efficiency monocrystalline panels (360 Wp each) Pick n Pay Longmeadow DC, Gauteng, South Africa. Owned and operated by Energy Partners Solar India's second largest rooftop solar PV plant on a single roof, constructed by Azure Power in 2016.

What is a roof-mounted photovoltaic system?

Rooftop photovoltaic arrays are installed on the roofs of homes as well as commercial buildings and structures. In comparison with ground-mount installations, roof-mounted systems are relatively small. However, there are MW-scale roof-mounted stations as well, and these are what the present post is about.

How many solar panels are installed on a rooftop?

More than 20,000 man-days were spent in installing this landmark and over 40,000 square meter of old roofs were replaced to make way for this plant. This solar array is one of the largest rooftop solar projects in North America. This system offsets Urban Energy's CO2 emissions by 1,001,340 kg/a. 13,000 solar panels installed on rooftops.

What is the largest rooftop solar project in North America?

This solar array is one of the largest rooftop solar projects in North America. This system offsets Urban Energy's CO2 emissions by 1,001,340 kg/a. 13,000 solar panels installed on rooftops. Phase 1 (500kWp) installed in 2014, followed by Phase 2 (additional 1000kWp) in 2015.
