-----

SAN DIEGO - The Department of Defense last month issued a small contract for a Navy project to develop and provide a modular energy storage system for its newest vessels including its ...

Our technology uses earth-abundant iron, salt and water to deliver environmentally safe solutions capable of providing up to 12 hours of flexible energy capacity for commercial and utility ...

Cache Energy is a U.S.-based technology company that produces advanced thermochemical energy storage systems for long-duration energy storage and heat electrification.

Antora Energy's BESS offers a potential cost-effective, large-scale stationary storage system that can be deployed on the scale of megawatts with durations up to 100 hours.

This new generation of microgrids must be highly mobile, integrate a diverse array of generation assets and energy storage systems, and employ sophisticated control systems to meet the modern...

The Navy and Marine Corps are actively pursuing enhancements in energy storage and micro-grid technologies to ensure continuous military operations, even when regional power grids fail.

This white paper explores the strategic benefits of deploying mobile battery energy storage systems (BESS) in defense operations.

The Department of Defense's Office of the Assistant Secretary of Defense for Industrial Base Policy, through its Manufacturing Capability Expansion and Investment Prioritization (MCEIP) office, has ...

The durability, domestically abundant materials and proven track record of lead batteries in military applications make this energy storage technology the leading source for submarine power in the ...

This paper highlights the evolving landscape of military energy needs necessitating available energy storage

# Wartime Energy Storage System

technologies required on a distributed, multi-domain battlefield.
