What precautions should be taken when working on batteries?

The following precautions should be observed when working on batteries:

- o Follow the recommended PPE requirements per the SDS for the battery to be used.
- o Batteries are an energy source that can produce high amounts of electrical current.
- o Remove watches, rings, and other metal objects.

How to maintain a battery?

The battery top should always be kept dry and clean to avoid short-circuiting of the battery terminals or any leakage of current between the terminals caused by the dirt accumulated on the battery top. Do not place any conductive parts or metal tools on the battery top.

How should a battery room be designed?

Battery rooms shall be designed with an adequate exhaust system which provides for continuous ventilation of the battery room to prohibit the build-up of potentially explosive hydrogen gas. During normal operations, off gassing of the batteries is relatively small.

How do I install a VDC battery cabinet?

Set first battery in cabinet and attach the long lead (fast-on connector side marked positive) from the cabinet to the fast-on terminal on the positive terminal of the battery. See Figure 24.
