The world's longest turbine blade with a total length of 123 meters rolled off the production line on Aug 30.

A 133-meter-long, 67-tonne wind turbine blade was successfully loaded onto a ship, breaking the record for the longest wind turbine blade lifting at ports in the Yangtze River basin. In ...

At the Port of Yangzhou, China, a 436-foot (133-meter) wind turbine blade weighing 73.8 tons was successfully loaded onto a ship, setting a record in the Yangtze River basin.

Yangzhou Port has become a central hub in the middle and lower reaches of the Yangtze River for loading and unloading wind power components, streamlining the movement of ...

Lianyungang Zhongfu Lianzhong Composites Group Co Ltd provided the 123-meter-long blades for the world's first 16 MW offshore wind farm in Pingtan County of Fujian Province, which ...

This case study exemplifies the potential of segmented blades to address both the physical and economic challenges of scaling up wind turbine technology, paving the way for larger, ...

China has made a significant breakthrough in renewable energy by successfully loading a 133-meter-long, 67-tonne wind turbine blade at Yangzhou Port, breaking the record for loading the ...

A 436-foot-long (133-meter-long), 73.8-ton (67-tonne) wind turbine blade was successfully loaded onto a ship at Yangzhou Port in China, breaking the record for the longest blade ...

The blades rolled off the assembly line on Thursday at the Sany Renewable Energy in the Bayannur zero-carbon smart industrial park. They will be installed in large megawatt wind turbine ...

China has taken center stage with its groundbreaking wind turbine technology. The recent successful loading

Yangzhuang wind blade power generation

of a 436-foot wind turbine blade at Yangzhou Port marks a significant ...
