Located on the southeast side of Zabuye Salt Lake, 165 km north of Zhongba County, Rikaze City, at an altitude of over 4,500 meters, this project is the world's first high-altitude, grid-end one.

After the project is put into operation, it will provide strong energy support for the development of lithium resources in the salt lake, with good energy saving, environmental protection ...

It is the world's first high altitude area at the end of the power grid, with trough solar thermal power station as the main power supply to realize clean energy isolated network operation. ...

Back in 2024, China launched a 3.5-gigawatt solar farm in the Xinjiang region that is believed to be the largest in the world and includes more than 5 million solar panels.

It is the world's first project to use a trough-type photo thermal power plant as the main power source, realize clean energy from an isolated grid operation at a highaltitude and provide a 24-hour safe, ...

On May 24, 2023, Zhongbu Qingtian New Energy will join hands to participate in the 16th (2023) SNEC International Solar Photovoltaic and Smart Energy (Shanghai) Conference.

Jiangxi Leping Zhongbu Shiligang solar farm is a solar photovoltaic (PV) farm under construction in Shiligang, Leping City, Jingdezhen, Jiangxi, China.

Zhongbu Qingtian New Energy showcased its full range of distributed photovoltaic power station business models, as well as photovoltaic module equipment string welding machines and cutting ...

In Europe, there was very little commercial CSP activity in 2024; no additional CSP plants started construction or were completed. In Italy, the CSP 3 Bilancia project, a 4 MW Fresnel plant with 16 ...
